

## Frost Statistics

Station: TULSA INTL AP    State: OK    ID: 348992  
 Latitude: 36.20 degrees    Longitude: -95.89 degrees    Elevation: 650 feet  
 Station period of record: 01/01/1931 - 10/02/2008

CLIMOD Product: Frost Statistics    Creation Time: 10/03/2008 11:02 CDT  
 Threshold temperature: 32.0 degrees F    Spring/Fall Cutoff Date: August 1  
 Requested years: 1995 - 2005 Distribution: Normal

Year	<u>Last Spring Occurrence</u>			<u>First Fall Occurrence</u>			Season Length
	Date	Temp	Missing	Date	Temp	Missing	
1995	Mar 9	24	0	Nov 3	28	0	238 days
1996	Apr 6	29	0	Nov 2	32	0	209 days
1997	Apr 14	32	0	Nov 10	28	0	209 days
1998	Mar 21	28	0	Nov 11	32	0	234 days
1999	Mar 26	30	0	Oct 24	32	0	211 days
2000	Mar 20	31	0	Oct 8	30	0	201 days
2001	Mar 26	31	0	Oct 27	32	0	214 days
2002	Apr 3	32	0	Nov 4	31	0	214 days
2003	Apr 10	31	0	Nov 6	31	0	209 days
2004	Mar 16	32	0	Nov 24	32	0	252 days
2005	Mar 17	30	0	Oct 25	31	0	221 days

Prob. occ.	100%	100%	
Earliest	Mar 9	Oct 8	201 days
90%	--	--	--
50%	--	--	--

Latest	Apr 14	Nov 24	252 days

- 1) **Date** is the date of last spring/first fall occurrence of a minimum temperature less than or equal to the threshold.
- 2) 'no' indicates no occurrence recorded during season.
- 3) 'missing' indicates 18 or more days of missing data before an occurrence was found.
- 4) **Temp** is the minimum temperature for that day.
- 5) **Missing** is the number of days with missing temperature data following the last spring occurrence or preceding the first fall occurrence of this temperature.
- 6) **Season Length** is the number of days between the last spring and first fall occurrences.
